

Employee Handbook Summary

A concise handbook file for onboarding, expectations, and workplace rules.

Module outcomes

- Know the rules that affect daily work
- Understand the importance of accurate attendance and records
- Use company property and systems responsibly

Attendance and Work Discipline

Employees are expected to report on time, follow assigned schedules, and observe attendance procedures consistently. Delays, absences, and schedule changes must be reported through the proper channel.

Accurate timekeeping protects both employee pay and operational planning.

- Observe your approved schedule and break periods.
- Report absences or lateness promptly.
- Avoid proxy attendance or falsified records.

Leave, Benefits, and Records

Leave applications, employee information changes, and benefits-related documents should be submitted accurately and within company timelines.

Employees are responsible for keeping personal and employment records updated.

- Submit required forms completely and truthfully.
- Check pay, benefits, and records regularly for accuracy.
- Raise discrepancies through the proper HR or admin process.

Use of Company Property and Systems

Company devices, accounts, files, and facilities must be used for legitimate business purposes. Access should only be used by the assigned employee.

Confidential files must not be copied, transferred, or disclosed without authorization.

- Protect login credentials and change passwords when required.
- Handle printed and digital files carefully.
- Use official systems and approved communication channels.

Handbook Topics Covered During Onboarding

Topic	What Employees Should Remember
Attendance	Follow schedule, submit corrections through approved process only
Leave	Request ahead when possible and complete all required approvals
Records	Keep personal, payroll, and government-related details updated
Property and IT	Use only for work, secure credentials, and protect company data

Note: This training file is a starter module for onboarding and can be uploaded into the LMS as learning content.
